Stocks of Grains in All Positions

SEP 21 1967

April 24, 1967

SOYBEAN STOCKS LARGER - LESS FEED GRAINS AND WHEAT

Stocks of the four feed grains on April 1, 1967 totaled 103 million tons -- 10 percent less than a year earlier and 19 percent below average, according to the Crop Reporting Board. Record high April 1 soybean stocks were 22 percent more than on last April 1 and more than one-third above average. Stocks of wheat were 23 percent below a year earlier; Durum holdings down 45 percent. Although down 2 percent from April 1, 1966, rye stocks were the second largest since April 1, 1944. Stocks of flaxseed were down 29 percent from a year earlier but 11 percent above average.

All wheat in storage on April 1 totaled 703 million bushels, 23 percent less than a year earlier and the smallest for the date since 1952. Off-farm holdings were 462 million bushels, 30 percent below last year and farm holdings of 241 million bushels were 6 percent less. Disappearance from all positions during the January-March quarter is indicated at 346 million bushels compared with 419 million bushels a year earlier.

Durum wheat stocks on April 1 totaled 46 million bushels, 45 percent less than a year earlier and the smallest April 1 holdings since 1962. Farm stocks of 29 million bushels were 41 percent below last year and off-farm stocks of 17 million bushels were 51 percent less. Disappearance during the January-March quarter was 19 million bushels compared with 17 million bushels a year earlier.

Rye stocks on April 1 totaled 24.3 million bushels, 2 percent less than a year earlier but the second highest for the date since 1944. Farm stocks totaled 7.6 million bushels, 24 percent less than last year but off-farm stocks of 16.7 million bushels were 12 percent higher. Indicated disappearance during the January-March quarter was 4.0 million bushels, about the same as for a year earlier.

Corn stocks of 2,704 million bushels in all positions on April 1 were 6 percent less than a year earlier and 17 percent below average. Current holdings indicate a disappearance of 959 million bushels during the January-March quarter compared with record high of 1,178 million bushels for the year-earlier quarter. Disappearance during October-March 1966-67 of 2,240 million bushels compared with 2,368 million bushels a year earlier.

Corn stored on farms totaled 2,034 million bushels, 4 percent less than a year earlier and 2 percent below average. About 18 percent of the farm stocks was under Government loan compared with one-fourth under loan on April 1, 1966.

UNITED STATES DEPARTMENT OF AGRICULTURE
Statistical Reporting Service — Crop Reporting Board
GrLg 11-1 (4-67) — Washington, D. C.

Off-farm stocks of 670 million bushels were 9 percent less than a year earlier and the lowest April 1 total since 1954. Corn owned or under loan to CCC accounted for slightly more than one-fourth of the off-farm total compared with slightly more than three-fifths a year earlier.

Oat stocks of 441 million bushels in all positions on April 1 were 18 percent below a year earlier and 12 percent below average. Farm holdings of 354 million bushels were 21 percent below a year earlier, and equaled 80 percent of total April 1 stocks. Off-farm stocks, at 88 million bushels, were up slightly from a year earlier. Disappearance during the January-March quarter of 219 million bushels compared with 227 million bushels a year earlier.

Barley stored in all positions on April 1 totaled 206 million bushels, about 7 percent more than a year earlier but 8 percent below average. Off-farm stocks, at 92 million bushels, were slightly below April 1, 1966. Farm stocks of 114 million bushels are about 15 percent above a year earlier. Disappearance during the January-March quarter was 86 million bushels, compared with 108 million bushels a year earlier.

Sorghum stocks in all positions totaled 530 million bushels, 27 percent less than a year earlier and 36 percent below average. Current stocks in all positions are the smallest for April 1 since 1958. Off-farm stocks of 393 million bushels were one-third less than April 1, 1966. Farm holdings, at 137 million bushels, were 2 percent above a year earlier. Disappearance during the January-March period reached a record high of 296 million bushels.

A portion of the revisions of durum wheat stocks in off-farm and all positions was omitted from the January Stocks of Grain Report which included revisions for other crops for the 1965 crop year. The January report included durum stocks revisions for off-farm and all positions for October 1966 and January 1966. Revisions for April 1966 are included in this report. Revisions for October 1965 and July 1966 are shown below. Revisions of on-farm stocks of durum wheat for October 1965 through October 1966 were published in the January Crop Production Report.

(Continued from page 2)

Soybean stocks in all positions on April 1, 1967 totaled 460 million bushels, 22 percent above the 376 million bushels held a year earlier and 37 percent above average. Off-farm stocks, at 241 million bushels, were 7 percent above a year earlier and farm stocks, at 219 million bushels, were 46 percent above.

April 1 stocks indicate a disappearance during the seven-month September 1966 - March 1967 period of 507 million bushels from a beginning supply of 967 million bushels (including a carryover of 36 million bushels). During the period 319 million bushels were processed for oil, approximately 163 million bushels were exported, and minor quantities were fed to livestock.

Flaxseed stocks in all storage positions on April 1 of nearly 19.0 million bushels were 29 percent below the large holdings a year earlier but 11 percent above average. Farm stocks were down nearly one half from April 1, 1966 and off-farm holdings, down 16 percent. Current stocks indicate a disappearance during the July-March period of 20.2 million bushels from a supply of 39.2 million bushels (carryover of 15.3 million plus 1966 production of 23.9 million). Reported disappearance for this period included 14.9 million bushels crushed and nearly 5.0 million exported.
